Re: Water Diversion

Dear Mrs. Johannsen,

Big Wood Canal Company and American Falls Reservoir District No. 2 are working in cooperation with the Watermaster for Big Wood and Little Wood River, to notify all waterusers, that their diversions from the river must meet Idaho Code #42-701, which requires all diversions to have a lockable control gate and measuring device. It has been brought to our attention that your diversion is in violation of the state code statute. You are advised that you will need to bring your river diversion up to code before April of 2004. It is the responsibility of the water user to install or have installed an approved gate and measuring device. Water will not be delivered to your diversion until it meets state code. Failure to comply could result in the Department of Water Resources issuing a notice of violation which can result in fines.

Please contact Lee Peterson, watermaster for the Big Wood and Little Wood River as soon as possible for information as to what types of control and measurement devices are available and what you will need in order to meet compliance with Idaho Code.

required or acceptable

Sincerely,

Lynn Harmon,
General Manager

Lee R. Peterson,
Watermaster Dist. 37 & 37 M
